Andile Mazibuko

Software Developer

Profile

Software Developer with practical experience developing and maintaining modern web applications, backend services and AI-powered bots. I enjoy solving problems through software, learning new technologies and building solutions that make a difference. I hold a Diploma in Computer Science and am looking to grow as a full-stack developer.

Technical Skills

Languages

java, python, typescript, javascript, sql

Frontend

angular, html5, css3, bootstrap

Backend

python (fastapi), node.js, rest apis

Databases

postgresql, mysql, firebase / firestore

Automation

power apps, power automate

Tools

git, github, docker, postman, visual studio code

Work experience

CSIR

Mar 2025 – Present

Software Developer intern

- Develop and maintain responsive web applications using Angular and TypeScript.
- Develop and maintain RESTful APIs and backend services using Node.js.
- Work with PostgreSQL and Firestore for data storage and application data management.
- Collaborate within an Agile team on code reviews, testing, debugging and deployment.
- Use Git/GitHub, Docker and Postman as part of the development and API workflow.
- Use Power Apps and Power Automate to support business-process automation and application workflows.
- Develop and maintain an AI-powered agent/bot to assist users with finance-related queries and provide relevant financial information.

Tech Mahindra

Nov 2023 – Nov 2024

Business Analyst intern

- Worked with cross-functional teams to understand business requirements and suggest IT solutions.
- Assisted with project documentation and supported technical implementation tasks.
- Conducted research to help improve processes for client projects.
